

LASA MARMO

DAS WEISSE GOLD AUS LAAS | L'ORO BIANCO DI LASA | THE WHITE GOLD FROM LAAS

WURZELN | ORIGINI | ORIGINS

Der Laaser Marmor wird in einem Bergmassiv im Vinschgau in zwei Brüchen gewonnen: Im Jennwandbruch (2.320m ü.d.M.) und im Weißwasserbruch (1.567m ü.d.M.). Beide werden im Untertagebau betrieben. Die Gewinnung des Laaser Marmors erfolgt heute wie in der Vergangenheit in Blöcken. Zum Einsatz kommen modernste Diamantseilsägen und Schrämmaschinen.

Il marmo di Lasa viene estratto dalle Alpi della Val Venosta, in due cave: la Cava di Jenn (2.320m s.l.m.) e la Cava dell' Acqua Bianca (1.567m s.l.m.). Le due cave sono in galleria. L'estrazione del marmo di Lasa avviene in blocchi, come in passato. Oggi vengono utilizzate modernissime segatrici a filo diamantato e tagliatrici a catena diamantata.

Lasa Marble comes from two Quarries in Val Venosta Alps: the Jenn Quarry (2.320mt. above s.l.) and the White Water Quarry (1.567mt. above s.l.). Both quarries are in galleries. Although Lasa marble is still quarried in blocks today as it has been over the years, the quarry now has much more modern tools at its disposal. The very latest mechanical saws and chain-saws have diamond-edged blades.
